## Subject Index of Vol. 137

**Aging**  
 collective dynamic aging of moving dislocations, 135

**Alloys**  
 discontinuous low temperature deformation of Zr-Sn alloys, 151  
 dynamic softening of spinodal alloy Cu9Ni6Sn during hot deformation, 185  
 experimental evidence on the dislocation mechanism of serrated yielding in f.c.c. metals and alloys at low temperatures, 141  
 plastic deformation of alloys with submicron-grained structure, 35  
 structure and stability of microcrystalline Mg-Ca alloy, 87  
 superplastic-like deformation in some solid solution alloys, 27  
 superplasticity in an Al-Zn-Mg-Cu alloy, 21

**Aluminium**  
 superplasticity in an Al-Zn-Mg-Cu alloy, 21

**Arsenic**  
 high temperature creep and transmission electron microscopy of GaAs, 173

**Atoms**  
 solute-atom segregation at internal interfaces on an atomic scale: atom-probe experiments and computer simulations, 57

**Bicrystals**  
 slip in a {112} bicrystal with asymmetrical orientations of the loading axis, 69

**Calcium**  
 structure and stability of microcrystalline Mg-Ca alloy, 87

**Copper**  
 dynamic softening of spinodal alloy Cu9Ni6Sn during hot deformation, 185  
 superplasticity in an Al-Zn-Mg-Cu alloy, 21

**Creep**  
 creep in metals at intermediate temperatures and low stresses: a review, 163  
 high temperature creep and transmission electron microscopy of GaAs, 173  
 on the creep of single-phase materials with essentially non-equilibrium structure state, 13

**Crystals**  
 cross-slip and work hardening of f.c.c. crystals, 177

**Deformation**  
 discontinuous low temperature deformation of Zr-Sn alloys, 151  
 dynamic softening of spinodal alloy Cu9Ni6Sn during hot deformation, 185  
 plastic deformation of alloys with submicron-grained structure, 35  
 superplastic-like deformation in some solid solution alloys, 27  
 the physics of superplastic deformation, 1

**Dislocations**  
 collective dynamic aging of moving dislocations, 135  
 experimental evidence on the dislocation mechanism of serrated yielding in f.c.c. metals and alloys at low temperatures, 141

**Gallium**  
 high temperature creep and transmission electron microscopy of GaAs, 173

**Hardening**  
 cross-slip and work hardening of f.c.c. crystals, 177  
 synergetic approach to work hardening of metals, 119

**Instability**  
 plastic instabilities: phenomenology and theory, 125  
 stored energy and structural instability in high temperature plastic flow, 111

**Interfaces**  
 solute-atom segregation at internal interfaces on an atomic scale: atom-probe experiments and computer simulations, 57

**Intermetallics**  
 brittle-to-ductile transition in silicon as a model for intermetallics, 105  
 plasticity of structural intermetallic compounds, 93

**Magnesium**  
 structure and stability of microcrystalline Mg-Ca alloy, 87  
 superplasticity in an Al-Zn-Mg-Cu alloy, 21

**Metals**  
 creep in metals at intermediate temperatures and low stresses: a review, 163  
 experimental evidence on the dislocation mechanism of serrated yielding in f.c.c. metals and alloys at low temperatures, 141  
 synergetic approach to work hardening of metals, 119

**Microcrystals**  
 structure and stability of microcrystalline Mg-Ca alloy, 87

**Microstructure**  
 formation of microstructure in rapidly solidified materials and its effect on properties, 77

**Nickel**  
 dynamic softening of spinodal alloy Cu9Ni6Sn during hot deformation, 185

**Plasticity**  
 plasticity of structural intermetallic compounds, 93

**Plastics**  
 plastic deformation of alloys with submicron-grained structure, 35  
 plastic instabilities: phenomenology and theory, 125  
 stored energy and structural instability in high temperature plastic flow, 111

**Portevin-Le Chatelier effect**  
 a comparison of the Portevin-Le Chatelier effect in constant-strain-rate and constant-stress-rate tests, 157

**Rapid solidification**  
 formation of microstructure in rapidly solidified materials and its effect on properties, 77

**Serration**  
 experimental evidence on the dislocation mechanism of serrated yielding in f.c.c. metals and alloys at low temperatures, 141

**Silicon**  
 brittle-to-ductile transition in silicon as a model for intermetallics, 105

**Slip**  
 cross-slip and work hardening of f.c.c. crystals, 177  
 slip in a {112} bicrystal with asymmetrical orientations of the loading axis, 69

**Softening**  
 dynamic softening of spinodal alloy Cu9Ni6Sn during hot deformation, 185

**Solutes**  
 solute-atom segregation at internal interfaces on an atomic scale: atom-probe experiments and computer simulations, 57

**Stability**  
 structure and stability of microcrystalline Mg-Ca alloy, 87

**Stored energy**  
 stored energy and structural instability in high temperature plastic flow, 111

**Strain**  
 a comparison of the Portevin-Le Chatelier effect in constant-strain-rate and constant-stress-rate tests, 157

**Stress**  
 a comparison of the Portevin-Le Chatelier effect in constant-strain-rate and constant-stress-rate tests, 157  
 creep in metals at intermediate temperatures and low stresses: a review, 163

**Structure**  
 on the creep of single-phase materials with essentially non-equilibrium structure state, 13  
 plastic deformation of alloys with submicron-grained structure, 35  
 plasticity of structural intermetallic compounds, 93  
 stored energy and structural instability in high temperature plastic flow, 111  
 structure and stability of microcrystalline Mg-Ca alloy, 87

**Superplasticity**  
 industrial aspects of superplasticity, 41  
 superplastic-like deformation in some solid solution alloys, 27  
 superplasticity in an Al-Zn-Mg-Cu alloy, 21  
 the physics of superplastic deformation, 1

**Tin**  
 discontinuous low temperature deformation of Zr-Sn alloys, 151  
 dynamic softening of spinodal alloy Cu9Ni6Sn during hot deformation, 185

**Transmission electron microscopy**  
 high temperature creep and transmission electron microscopy of GaAs, 173

**Zinc**  
 discontinuous low temperature deformation of Zr-Sn alloys, 151  
 superplasticity in an Al-Zn-Mg-Cu alloy, 21
